CAPSTONE FIRE SYSTEMS, LLC
PROTECTING WHAT'S IMPORTANT.

FUTURE SERVICE DEVELOPMENT

COMING SOON / SERVICE DEVELOPMENT

Advanced Fire Detection & VESDA Systems

Expanding Our Capabilities.
Advancing Early Fire Detection.

Planned full-lifecycle capabilities for mission-critical, industrial and commercial properties.

Original conceptual illustration - not an active Capstone project

LONG-TERM SERVICE VISION
DESIGN / INSTALLATION / COMMISSIONING / MAINTENANCE

THE TECHNOLOGY

A smarter view of the earliest warning.

Aspirating smoke detection (ASD) continually draws air from sampling points through a pipe network and into a detector for analysis. Engineered early smoke detection may provide time for investigation and response in demanding environments.

PLANNED CAPABILITIES

01 **Design & Engineering**
Qualified design leadership, sampling network concepts, and documentation.

02 **Installation & Construction**
Approved piping and device installation with coordinated field controls.

03 **Programming & Commissioning**
System configuration, interface testing, verification, and turnover.

04 **Inspection, Testing & Maintenance**
Future lifecycle care, system checks, documentation, and ongoing service.

TARGET INDUSTRIES

Focus on demanding environments.

- **Data Centers**
- **Industrial Facilities**
- **Telecommunications**
- **Commercial Properties**
- **Warehousing & Specialized Storage**

BUSINESS DEVELOPMENT ROADMAP

Milestones are planned, not completed.

01	**Manufacturer training & technical development**	PLANNED
02	**Licensing & operational readiness**	PLANNED
03	**Initial approved service launch**	NOT LAUNCHED
04	**Regional expansion**	FUTURE STAGE

WHY THIS INITIATIVE MATTERS

Potential earlier awareness of smoke events • Specialized technical expertise under development • A planned design-to-maintenance model • Mission-critical construction coordination • Long-term system maintenance planning.

IMPORTANT STATUS & QUALIFICATIONS NOTICE

This initiative is under development. Capstone is not currently representing that it holds Xtralis or Honeywell authorization, VESDA accreditation, or all licenses and qualifications required to offer these proposed services. This brochure is informational only, not an offer to contract. VESDA is referenced descriptively; no endorsement or partnership is implied.
